GULFARIUM

1010 MIRACLE STRIP PKWY

Type: ROUTINE INSPECTION

FT WALTON BEACH, FL 32548

Date: 24 April 2014

3.101 (d)

FACILITIES, GENERAL.

The walk in refrigerator has maintained consistent temperatures above 40 degrees since January 2014. The floor of this refrigerator also has an area in the back right corner where the paint has worn away and has exposed the underlying rock matrix. This area can no longer be cleaned & sanitized due to the porosity of the exposed concrete floor in this area.

The current temperatures and condition of the floor in this refrigerator prevents proper cleaning of this unit and does not adequately protect the food from deterioration & spoilage

Correct by May 15, 2014

The exit interview was conducted with the General Manager.
